In a little note accompanying his subscription renewal, Herbert J. Hennessy of Long Beach, Calif., remarks, "News reports on California fires are likely quite accurate, but the Tehachapine (pronounced Tee-hatch-a-pine) — Bakersfield quake of eight or ten years ago is the only major earthquake out here since the Long Beach quake of the early thirties. But in general it seems these manifestations of the elements, rain, cold, quakes, etc., have freakish unexplainable actions. Our recent rain for instance; Santa Barbara fall was about 14 inches except for in one small area of the city. In this one particular spot the precipitation exceeded five inches."

RADKA REPORTS ON CON. CON.

"It is a legislative problem, not a problem for the Constitution Convention," Every delegate has repeated this statement many times each day either in committee or in response to questions or problems presented by citizens. You will hear this answer many times in the months ahead. Usually this is an honest answer and not an attempt by the delegates to dodge the problem. I would encourage citizens to present their questions and problems to the delegates despite the fact that their ultimate solution will be the responsibility of the legislature. I conclude this for three reasons:

1. Those who draft a constitution must recognize the problem of the legislature even though the constitution can not solve all legislative problems.
2. The adoption of a new constitution would require revision of many laws that have been passed by the legislature and those charged with the responsibility of the task could consider the legislative problems raised at the Constitutional Convention.
3. Every committee and many delegates of the Constitutional Convention have and will continue to "lean on" the Senators and Representatives urging the legislation that will be good for the State and also reflect the will of the people.

I was appointed to serve on two sub-committees of the Public Information Committee: Radio and Television and Civic, Labor, Fraternal and Community Groups.

The Convention number has been changed to IV 7-6171.

The 18 November local government committee had thirteen visitors. They were all local government officials interested in Michigan's new constitution. The interesting fact is they were all from the Republic of Indonesia.

Optimism Is "Cautious" . . .

U. S. businessmen are now expressing concern publicly that what they regard as an anti-business climate prevailing in influential Washington circles could have an adverse effect on consumer buying and business progress. What worries retailers is the feeling that increased legislation directed at business will develop an apprehensive and suspicious attitude on the part of the consumer.

A recent report from the University of Michigan Survey Research Center, indicates that an attitude of "cautious optimism" now prevails among American consumers.

Many businessmen feel that the senate majority has presented unfair, biased anti-business reports to the nation that might well impede the present upturn in the economy, since new laws, regulations and new taxes all fall heavily on business.

There have been violations of ethical business practices. But in the main American free enterprise, has conducted itself with honor, and present business practices do not indicate a need for sweeping legislation or investigation. Much of what is being done in Washington in the name of the consumer is, in effect, detrimental to the very businesses he owns.

Should a hostile business attitude continue, it could well show up in the labor market and cancel gains in the unemployment situation, curtail consumption, and result in slowdowns for manufacturers and suppliers.

The matter of prices is also of concern since business is uncertain as to what it is required to do about them. Washington economists are vetoing any idea of price increases, but at the same time they are not indicating any curb in wage increases that are putting pressure on prices. In the face of such reasoning, business feels if inflation comes, it will be charged with the responsibility—not the labor unions—for the resulting high prices. No wonder it is confused.

The growth of the United States resulted from private enterprise, and from the profit earned through trade and commerce. But as William McDonnell, chairman of the First National Bank of St. Louis, says, "In some quarters making a profit is looked at as akin to piracy."

Price Of Welfarism . . .

From U. S. News & World Report: "Nearly 132 billion dollars—That's what it cost taxpayers last year to run the Federal, State and Local governments. And the load keeps rising. The private economy is growing too, but not as fast as taxes."

The average man works a fourth of his time to pay his tax bill."

All in all, the magazine goes on to point out, the tax burden today is close to 30 per cent of the entire national output—20.3 per cent of that output being taken by the federal government, and 8.2 per cent by state and local government. Percentage-wise, state and local tax collections have shown the most rapid rise in late years. But the possibility of further increases in the

AND, SUDDENLY

IT'S ONLY THREE WEEKS UNTIL CHRISTMAS

federal tax load is facing us.

What's the solution? There are various answers, some of a highly technical nature. But one thing is sure—unless non-essential spending is eliminated, at all levels of government, the time will come when you'll be working a third, or a half, or two-thirds of your time to pay the cost of government. This is the price of having government take care of you from cradle to grave.

The election of officers for the Kiwanis club last week resulted in the election of Charles E. Moore as president, and Farnham Malsom, vice president. Sheriff Frank Bennett and a group of other nimrods went deer hunting the opening day of the season and when Frank didn't get his deer, the gang gave him a lot of ribbing. "Never mind," said the sheriff, "I'll get mine yet but I don't intend to hunt until the last part of the season. I prefer to leave the deer to those fellows who come here from out of the county to hunt. They spend their money here and we local nimrods who are in business and want the tourist trade should let them have the first privileges." Then, as the season went on, the gang kidded the sheriff about not knowing how to hunt. Now the laugh is on the others for Monday, just as he said he would do, Frank went out and was back within an hour with his buck.

Local Soldier In Combat Training Exercise

Fort Riley, Kan. (AHTN) — Army Pfc Bernard W. Hall, Jr., whose parents live at 105 Vilas St., Grayling, is participating with other personnel from the 1st Infantry Division's 121st Signal Battalion in five weeks of combat training at Pike National Forest in Colorado. The training is scheduled to end December 10th.

Designed to improve individual and unit combat efficiency, the training includes cold weather operations and mountain warfare tactics. The rugged terrain of Pike National Forest and the average November temperatures ranging to five below zero make this area especially suitable for such training.

Hall, a radio teletype operator in the battalion's Company, which is regularly located at Fort Riley, Kan., entered the Army in December 1958.

The 23-year-old soldier is a 1957 graduate of Grayling High School.

"Read The Avalanche"

"The Priceless Ingredient"

I heard one of those ancient fables the other day that have a way of making more sense than a lot of our modern editorials. The "moral" of the story is as it was in ancient times—perhaps even more so when you consider how modern manufacturing and selling techniques have a way of making shoddy products and not-quite-honest business dealings look good.

Anyway, here is my little "fable". I'm sure you'll agree with me it makes a good point. In ancient times in the city of Bagdad lived a wise old man called Hakeem. A great many people went to him for advice, which he gave freely to all.

One day there came to him a man who had spent much money but had received little for his wealth, and he said: "Tell me Wise One, what should I do to receive honest value for what I spend?"

Hakeem answered by saying: "A thing which is bought or sold has no value unless it contains that which cannot be bought or sold. When you are dealing in the market place you must always look for the Priceless Ingredient."

"But what is the Priceless Ingredient?" asked the man. Spoke the Wise One: "My son, the Priceless Ingredient of every product in the market place is the honor and integrity of him who makes it. Consider his name before you buy."

We do our very best to put that Priceless Ingredient in all our dealings.
